SUMMARY

I am a **front-end engineer** with more than **4 years** of experience and a slight acquaintance with back-end development. I am working for **Digikala**, one of the top 3 websites in Iran with about **9 million visits per day**. Digikala is an Iranian online store, similar to Amazon.

EDUCATION

Islamic Azad University, Najaf Abad Branch - Isfahan
Bachelor's degree, Computer Software Engineering
Sep 2016 - Sep 2021

EXPERIENCE

Digikala, Tehran, Iran — *Front-end Engineer*

Aug 2020 - Present

- Worked in a highly collaborative **agile team** environment with more than **50 people** in different teams.
- Wrote **unit tests** for essential tools and components with **Jest** and **React-Testing-Library**, which reduced reported bugs and errors by 30% in one month.
- Wrote **E2E tests** for the main flows on the site like add-to-cart, and payment with **Cypress**.
- Proposed and innovated a **service** with a new and **fast algorithm** to **track user** behavior with products and banners on the site, which increased the accuracy of the tracked information by 90%.
- Developed a service to **automatically show and hide different features** and sections of the site in **Demo** and **Production** versions, which is applicable in promotions and even for a certain number of users.
- 10% improvement in product **page load speed** and **30% reduction in API requests** by caching data, reusing static information, and removing static requests.
- Increased website view limit by 5x in promotions by **rewriting the website with react**.

SnappCarFix, Esfahan, Iran — *Front-end Team Lead*

May 2019 - Aug 2020

- Implemented **4 PWA** and **2 Admin Dashboard Panels**.
- The **standard version (x,y,z)** was used for projects, and the automatic update of the **client-side cache**, which in the long run improved the process of product development and updating by 20%.
- **Designed a single layout** for the organization's sales sites. Using this template, you can create a completely new site in just 24 hours.
- Grew the **Lottie animations performance** by 80% by developing a new wrapper.
- **60% improvement in SwiperJs** performance by writing a wrapper in the project and using it frequently throughout the whole project without loss of performance.
- Made **high-performance and high-use timer parts** for advertisements and discount banners on the site, which improved the site's loading time by 2 seconds.

- Rebuilt the platform from WordPress to React and made more requests with **better UI/UX** and fewer development hassles resulting in a **90% improvement in user experience**.
- **I managed 10 people**, working on **3 individual project types** with the same technology for different parts of the company.

Self-Employed, Esfahan, Iran — *Freelance*

Jan 2019 - May 2019

- Designed and implemented **2 web platforms** with **React, PWA, and Django** for club management and product sales, which have been running for more than 3 years.
- Created more than **12 landing pages** for events and promotions.
